

Celebrating our Progress

Each year Laurel Springs monitors strategic goals for improved student learning. We are proud of our accomplishments since the WASC visit in 2006. Our accreditation visit is a time to celebrate together!

Students are committed to learning!

- As a result of our increased time management support, 30 percent more students are finishing all their courses!
- Every year, a greater number of students turn work in on time and finish all their courses before their enrollment ends.

Test scores are above the national average!

- CTBS scores have risen in the reading and Language Arts sections.
- SAT scores continue to more than 40 points above the national average in Verbal/Critical Reading and in Writing.

College entry is an option for every graduate!

- Laurel Springs is now exclusively college prep, and every student is helped to complete college requirements. Our students reach their dreams with acceptance to Yale, Stanford, Harvard, etc.
- College and career planning services have been drastically increased, including a core teacher for every senior, and a college and career planning course.

Curriculum is rigorous and flexible!

- All LSS students have access to college prep coursework that is challenging and appropriate for their learning style. Our K-8 curriculum paves the way for our college prep curriculum.
- All core courses are aligned to California standards and (where applicable) UC a-g standards.
- Interactive foreign language courses in five languages are now offered for all grades.

Teachers are highly qualified!

- Since 2006, we have welcomed 14 new teachers to our faculty. All Laurel Springs teachers have either a credential in their subject area, or an advanced degree and demonstrated success as teachers.
- Participation and collaboration among teachers has increased by 30 percent, due to improved technology and the formation of committees devoted to address student needs.

Community has expanded!

- Laurel Springs now offers its students a way to meet and communicate with fellow students through our virtual MyLaurelSprings student community.
- Our new Virtual Library provides resources to help students study and complete homework assignments.
- Our parent community has expanded with our Parent Seminar Series and Virtual Open House.
